TOP DOCTORS

and Dentists Issue

Area physicians and nurses were asked:
If someone in your family were sick,
whom would you call?

Staff Message

Top Doctors and Dentists

Health and Beauty's Most Recommended Doctors
Issue for Fairfax County

We are very excited to present our third "Top Doctors and Dentists" issue and hope that you find it to be a useful resource.

This list was compiled from the results received from surveys completed by physicians and dentists throughout the Washington Metropolitan area. The survey was sent to 1600 physicians and dentists asking whom they would send members of their family to in each of 25 medical specialties.

The location of each physician or dentist recommended determined the zone in which they were listed.

This list represents area physicians and dentists recommended on our survey, not necessarily the best doctors in the area. Some of the area's first-rate and best doctors may not be included on this list due to the subjective nature of the survey.
